

CCTV SYSTEMS

www.superiorgroup.ie

CCTV Systems are, without a doubt, the most used form of Crime Prevention in today's society. Be it on a Residential Home, Business or Industrial setting.

What are the Benefits of CCTV?

A CCTV system allows the use of cameras to monitor the interior and exterior of a property, transmitting the signal to a monitor or set of monitors.

Deterring Criminal Activity is the biggest and most recognised benefit for those who choose to add CCTV systems to their property. Outside of being able to monitor your premises, CCTV cameras are an excellent deterrent for burglars. Just like seeing a mounted alarm system, an intruder seeing cameras may decide that it's easier and safer to move elsewhere. It's much better to prevent intrusion than dealing with it after it's occurred.

If CCTV would benefit you or your business contact Superior Group today and arrange an on site visit where we can design and recommend a CCTV system to suit your needs and budget. Systems can be tailored, from a single camera to multiple camera monitored system.

- HD Systems
- IP Systems
- Remote Viewing via Phone
- Remote Monitoring via Station
